SUMMARY

Full Stack Developer with experience in building scalable web applications using React, TypeScript, Node.js, and .NET. Skilled in developing secure, role-based systems and managing databases with MySQL and MS SQL Server. Experienced in collaborative development using GitHub and Azure DevOps, with a focus on performance, usability, and continuous improvement.

WORK EXPERIENCE

MIS Office, Mandaue City Hall

Zamora Street 6014 Mandaue City, 6014, Cebu, Philippines

Intern – Full Stack Developer

December 2025—April 2026

- Designed and developed a full-stack web app Asset Management System that enhances asset tracking and operational efficiency
- Built the system using React, TypeScript, Tailwind CSS, C#, .NET, MS SQL, and Azure DevOps for version control.
- Developed core modules including asset registration, asset assignment (PAR), purchase order management, and asset disposal tracking.
- Implemented role-based access for admin and employee users, ensuring secure and organized system usage.

FREELANCE

Full stack Developer | Web based Modern Notepad

- Engineered and deployed a secure full-stack note-taking application using Node.js, Express.js, and MySQL for persistent and encrypted note storage.
- Developed a responsive and type-safe frontend using React, TypeScript, and Tailwind CSS, ensuring a seamless user experience across devices.
- Maintained and enhanced a live web application actively used by users, focusing on performance, usability, and system reliability.

Backend Developer | Job Request Ticketing System

December 2025–March 2026

- A web-based job request and ticketing system that streamlines the submission, tracking, and resolution of service requests. The system improves workflow efficiency by organizing requests into tickets with status monitoring and role-based handling.
- Built the backend using C# with .NET Framework, integrated with MS SQL Server for database management, and GitHub for version control and project collaboration.

Maintenance & Frontend Developer | Bagkuning E-Commerce and JoyMove Mobile App

2025–present

- Bagkuning E-Commerce: Maintained and enhanced a deployed e-commerce platform using Next.js and Firebase, implementing performance optimizations and feature improvements to enhance SEO and overall user experience.
- JoyMove Mobile App: Contributing to the continuous development of mobile features and UI refinements to enhance user engagement and platform stability.

ACADEMIC PROJECT

Backend Developer | Capstone – Online Record Management System

- Designed, developed, and deployed an Online Record Management System for the Registrar's Office at Benedicto College to digitize and streamline school operations.
- Enables the registrar to manage student records and automatically generate requested documents, while allowing students to conveniently submit requests online.
- Built the system using React and Tailwind CSS for the frontend and Node.js, Express.js, and MySQL for the backend, implementing RESTful APIs and using GitHub for version control and collaboration.

EDUCATION

Bachelor of Science in Information Technology

2022–2026

Benedicto College

A.S Fortuna St. Barangay Bakilid Mandaue City

SKILLS

Programming Languages: C++, C#, TypeScript

Front-End Development: HTML, CSS, JavaScript, Tailwind CSS, React.js

Back-End Development: Node.js, Express.js, .NET, Firebase

Databases: MySQL, MS SQL Server

Development Tools: VS Code, Git, GitHub, Azure DevOps, Postman

Soft Skills: Active Listening, Problem Solving, Adaptability, Agile Mindset
